Funeral of the Late Mrs. William Green

The death of Mrs. Margaret Jane Green, beloved wife of Mr. William Green, of Oyen, occurred at her home on Thursday, May 2, 1929, in her sixty-fourth year. While not in the best of health for some time past, her general condition had not given any cause for alarm, and on the day of her death, she appeared in better spirits than usual. Shortly after the midday meal, Mr. Green left to work in the field, and on his return to the house found his wife dead on her bed.

The funeral was conducted on Saturday afternoon, May 4. Following a brief service at the house, the body was escorted to Oyen, where service was held in All Saints Church at 2 o'clock. Rev. L. C. Scott, officiating.

The number of mourners present to pay their last respects was so great that many were unable to enter the church. Interment followed at Oyen cemetery.

Her three sons, Robert, Charles and Alton, Mr. George Fowler, Mr. Frank Chapman and Mr. Charles Sweeney acted as pallbearers. The many beautiful floral tributes, testified to the esteem in which the deceased was held.

The late Mrs. Green was held in the esteem of all who knew her. She was a good and loving mother and a kindly neighbor, and her many kind and generous acts will be long remembered by a wide circle of sorrowing friends. The late Mrs. Green was predeceased by her son John, who gave his life in the great war. Besides her husband, she is survived by five children, Mrs. W. J. Leach of Pembroke, Ont., Robert of Oyen, Charles Cecil of Regina, Mrs. George Fowler of Oyen and Alton of Calgary; three sisters, Mrs. Peter Lenzie of Ottawa, Mrs. James Mullen of Pembroke, Ont., and Mrs. Matthew Wilcox of Franklin, Man., and one brother, Mr. Isaac Franklin of Eston, Sask.

Mr. and Mrs. Green first came to western Canada from Ontario in 1905, when they lived for short time in Blount. The following year, Mr. Green homesteaded in this district and made a permanent home here in 1912.

Fuego Oil Co. will Resume Operations At Oil Well

Mr. Robert Campbell, secretary of the Fuego Oil Co., who has been spending the winter months in Ontario, returned to Oyen yesterday. Mr. Campbell informed the News that new casing for the well is on its way here, and operations will be recommenced at the well site in the near future.

Mr. McArthur, one of the directors of the Company, and Mr. McEasters, well driller, are expected to arrive from Toronto, some time next week.

Proposes to Start Choral Class

Mr. George Benbow proposes to start a choral class for girls between the ages of 10 and 17 years. If enough young people signify their willingness to join such a class with a view of promoting more and better singing in the community, he will start same. Practices would be held twice a week, 45 minutes each, with a nominal fee of 10 cents per week. Any young people desirous of joining should communicate with Mr. Benbow at once.

Will Build New United Church

At a meeting following the evening service at the United Church, last Sunday, the Church Board were authorized to go ahead with the plans to build a new church. Approximately \$4000 has been subscribed, and with this amount toward the \$8000 objective, it was felt that the work of building should be started as soon as possible.

LEGAL NOTICES

Radio—An Agency for Peace

The sittings now being held by the Royal Commission on Radio appointed by the Dominion Government to study the whole question of broadcasting, and make report to the Government as to best policy for Canada to adopt in the Central Western States that it is to "get" stations in Eastern Canada, and for Eastern Canadian listeners to receive the programmes broadcast from New York, Philadelphia, and other Eastern United States cities that it is for them to "tune in" on Western Canadian Stations—a condition for which it is hoped the present Radio Commission can find some solution, the fact remains that a closer community of interest between Canada and the United States, and consequently a still better understanding, is being developed by means of the radio. Amounts of interest and understanding is the greatest of all subways to Peace.

But to many in this country it will come as a welcome surprise to learn of the great part played by radio in Europe in the effect it is having in promoting greater understanding among the diverse nationalities and languages of that war-afflicted continent. It is almost inconceivable that within less than eleven years of the signing of the Armistice following the Great War, the radio should be used in Germany and England to teach the people, not merely school children but adults, the French language; that international "hook-ups" of Germany, Poland, Austria, Hungary, France, and other countries regularly carried out, so that people in Paris and Warsaw can listen to German concerts in Berlin and Hamburg, and the German people can enjoy the opera in Paris, or a great symphony orchestra in Vienna or Budapest.

There are some who say that Canada still retains the old fashioned idea that it is unpatriotic, and liable to undermine British institutions in this country, if children are taught in our schools to speak and read French, German, or any language but English. In fact, Canada would in a generation become more powerful, influential and prosperous. It would open to our people the rich literature of both races; it would give us greater prestige among all nations; it would help to promote our export trade in all the markets of the world. In this Canada, by reason of its two great races, has an opportunity no other nation enjoys, yet we are not in the least neglecting it but many people urge that it would be disloyal to our British connection to encourage it.

It is predicted that within three years, five years at the most, Canadians will, through the development of national broadcasting at home, and the use of the best system of wireless in the world, be able to sit in their homes and "listen in" on the finest programmes in the world broadcast from London, Paris, Berlin, Vienna, and other European centres of culture, art and music.

We can now speak with Europe by telephone from the heart of Canada's prairies, and the day is fast approaching, so those in a position to know authoritatively state, when by radio we will be in more or less constant communication with Europe, and the important news of the day, public addresses, vocal and instrumental music, and the like, will be in our ears. In turn, Canada will be receiving equally close to them, and, in all probability, "seeing" Europe and European happenings through the instantaneity of the air. We will more or less rapidly follow "hearing," just as, in reverse order, the "talking" picture has followed the silent picture.

And these things are all to the good, in the cause of world peace. As we know people can understand them our prejudices and suspicions are removed. We learn they are human just like ourselves; they have high ideals and are inspired by lofty motives; they love the things we love, and hate the unclean, the ugly, the vicious, just hate them. As we come to understand their difficulties and aspirations, and they come to understand ours, mutual sympathy will develop, followed by a desire for co-operation, rather than antagonism.

It is only so, through mutual understanding, that permanent world peace can be maintained and the maximum of true progress be made.

Cuticura Heals Face Disfigured With Itchy Pimples

"I had pimples all over my face. They were hard, sore and red and some of them were just like little boils. Some of them festered and scaled over, and itched and burned causing me to scratch. Scratching caused eruptions and the irritation prevented me from sleeping. The disfigurement was so great for many weeks. I tried different remedies without any results. I began using Cuticura Soap and Ointment and in a few weeks before my face was completely healed after using two cakes of Cuticura Soap and one box of Cuticura Ointment." (Signed) Miss Harriet Hamilton, Box 777, Yorkville, N. B.

Main Cuticura Soap and Ointment your every-day toilet preparations and have a clear, even skin, soft, smooth hands and a healthy scalp with good hair.

Measuring Lightning Flash

No Part Of It Ever Lasts For Appreciable Time

A lightning flash takes about one-seventh of a second to occupy itself and no part of it lasts more than approximately one-thirty-fifth of a second. This is the first time in history that the speed of a lightning flash has been measured. It has also been proved that lightning starts from the clouds and the ground at nearly the same instant, and approximately one-seventh of a second later the two ends unite in mid-air. These facts were determined by Dr. C. G. Boys, a British physicist, who has been attempting hundreds of photographs for the last twenty-six years until a stroke of lightning in Alaska at last gave him this information.

Northern Air Ports

Settlements in Northern Manitoba

Manitoba's northern settlements of Oxford, Goddard, and Island Lakes will be added to the growing chain of northern air ports, says Mr. P. J. Veniot, postmaster-general, announced in the House of Commons.

Mr. Veniot stated that arrangements had been completed for the conveyance of mail to and from these points once a week by the aeroplanes of the government forestry patrol at Norway House, at the north end of Lake Winnipeg.

RHEUMATIC PAINS

Cannot Be Rubbed Out—The Trouble Must Be Treated Through the Blood

The pain of rheumatism is something that you cannot rub out. Every sufferer from rheumatism has been advised to rub this or that liniment or oil on the affected part, but after all the rubbing the pain remained. Pain blood and rheumatism come together and if they are properly treated will much relieve. Then I mean this blood, and this blood is something that can be cured, or, if you will not build up the blood until the rheumatic poisons are driven out? This is exactly what is done in the treatment of rheumatism with Dr. Williams' Pink Pills. Rheumatism is a very form shows improvement as the blood is built up, and when the poisons in the blood are overcome and driven out rheumatism disappears and does not return so long as the blood is kept rich and red. The great value of Dr. Williams' Pink Pills in the treatment of rheumatism is proved by the case of Mr. Thomas Martin, of New York, who says: "For some years I was so badly troubled with rheumatism that I could hardly walk and suffered great pain. I had medical treatment but did not get any relief. Then I decided to try Dr. Williams' Pink Pills and the trouble disappeared and has not returned the least sign of returning."

You can get these pills from your druggist, or by mail from the box from The Dr. Williams' Medicine Co., Brockville, Ont.

Pedigreed Hatching Eggs

A record shipment of pedigreed White Leghorn hatching eggs was made recently by the Poultry Breeders' Association of British Columbia to a hatchery at Petaluma, California. The shipment consisted of 36,000 eggs valued at \$5,000.

New Death Dealing Ray

Electrical Director Recently Invented Develops Three Million Volts
H. H. Nelson-Smith, engineer on the coast of the Pacific Gas and Electric Company in San Francisco, said a "death ray" device had been invented by B. J. Martin, electrical engineer, who lives in San Francisco. He said, was capable of developing three million volts. The Martin machine, Nelson-Smith stated, was housed "somewhere in San Francisco," but its exact whereabouts is being kept secret. The inventor carried working in co-operation with the electric company.

"Anyone who got in the path of the ray would be instantly snuffed out," the chemical composition of his blood would be changed and the life cells disintegrated," he said.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kallag's remedy that will give relief to those for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy. The first warning of trouble. Its use is simple, it is slight, and it can be purchased at any drug store.

Discovers Hungarian Tribes

Historian Finds Ancient Settlement In Heart Of India

Professor Stephen Gajard, archaeologist and historian, has returned from a 12-months exploration trip in India and announced that he had discovered a Hungarian tribe in the heart of that country. He said they were named Mar and Marva.

He also said that he had found the ruins of an ancient palace, together with manuscripts, statues and ceramics which proved that the palace belonged to a Hungarian prince.

These tribes, the professor said, were descendants of Magyar nomads who left their homeland to conquer Europe with the army of Attila, 1,100 years ago.

B.C. Salmon Pack

The position as regards the salmon pack of British Columbia is improving under present conservation methods. The 1928 pack is now reported at 2,395,635 cases, which is only 29,561 cases lower than the record pack of 1926. The pack of fish is valued at 792,362 cases, or 19,389 cases more than the 1926 record.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence who is infested with worms can take this preparation without a grain of the stomach, and will find in it a sure relief and a full protection from these destructive pests which are responsible for much sickness and great suffering to families of little ones.

The Teacher—You have failed in geography again.
Bobble—No'm. You only sat me did I know the capital of Minnesota. I said I didn't know, that was true.

Worms cause fretfulness and rob the infant of sleep, the great nurser, Mother Graver's Worm Exterminator will clear the stomach and intestines and restore healthfulness.

From July 14 to 17, 1913, 88.35 inches of rain fell at Hagulo in the Philippine Islands. More than 49 inches fell on one day.

Neuralgia succumbs to Mianard's Liniment.

Attractions For Tourists

Vast Extent Of Canada Offers Visitors Interesting Holiday

Canada has a million square miles of forest, countless lakes and thousands of miles of river and coast, providing the finest hunting, fishing, canoeing and camping. The vast extent of Canada and the diversity of conditions in different sections make it difficult for the prospective visitor who is not familiar with the country to decide which particular section interests him most. To overcome this the Department of the Interior has published "Vacations in Canada," a 96-page handbook which sets forth the attractions which Canada offers to tourists and sportsmen. This booklet describes the tourist attractions of each region in the Dominion—the climate, the motor roads, the points of historic interest, the fishing, hunting, canoeing and camping, the principal cities and the popular summer and winter resorts. In addition it gives the regulations of the Canadian Customs regulations. "Vacations in Canada" is distributed without charge from the Natural Resources Intelligence Service, Department of the Interior, at Ottawa.

Miss Oratorical Contest

Marcelle Brunet, 17, of Newwood, Man., representing the French-speaking schools of the province, won the oratorical contest at the other day. She was opposed by ten entrants from English-speaking schools in the final match. Miss Brunet will represent Canada in the Canadian oratorical finals. She attended convent at St. Adolphe, Man.

Sore Corns Drop Off If You Use "Putnam's"

When you notice any sign of callosities on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft, let it be on top or between the toes. Putnam's will remove it without pain. It does the work—and roots out the corn, quickly and without pain.

Health and Motor Accidents

Men with high blood pressure should use extraordinary care in driving automobiles, according to recent experiments conducted by psychologists of the personnel research federation. These experiments, showed a definite relation between health and motor accidents. Men with high blood pressure were found to have more than twice as many accidents as those with normal pressure.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Early automobiles can be driven almost at low tide on the beach of Jacksonville, Fla. The sand is as firm as on a paved street.

Minard's Liniment relieves pain.

Einstein should make a good train carter or bellhop, as nobody can out-durst what he is talking about.

Grain Commission Discovers Many Matters That Should Be Rectified To Good Advantage

The appointment of the Saskatchewan Commission of Inquiry was the result of accumulating complaints and of a combination of circumstances last fall. Wheat was down in price, the yield and quality of the grain in a large part of Saskatchewan had suffered on account of frost, and there was steeper grading with a view to protecting the reputation of Canadian wheat in the export market. Increasing complaints culminated in a demand for the reorganization of the Board of Grain Commissioners, and the same demand was heard in Alberta and Manitoba. With a view to getting the facts clearing up the situation as far as possible, the Saskatchewan Government appointed the commission of inquiry.

There have been many complaints appointed by the provincial and federal governments to investigate the handling of the grain. They have all suggested improvements, and an incidental result has been the education of the farmers on the grain question through reading the evidence taken and the reports made by the commissions. While there may be a great deal of misunderstanding among some of the farmers, there are others who have an intelligent grasp of their own business that is not surpassed by that of the farmers of any other country. Improvements in the methods and system of handling the grain are, also, constantly discussed by the committees on agriculture at Ottawa, and a great deal has been done in past years toward protecting the interests of the farmers.

The present commission of inquiry report, finds many minor matters that it thinks should be rectified, and it entirely agrees with the complaint of the farmers that the Grain Board is too far removed from them. The Board is given power for good service in many ways, and it is recognized that it was hampered by the conditions under which it was working. Under the Grain Act, its headquarters are at Fort William, and it had an inadequate staff of inspectors to deal with complaints throughout the West. It was asked from the question whether a board of three commissioners could properly handle a field. The commission recommends the enlarging of the board, the location of the head office where the board thinks best, and the maintenance of offices at Fort William and Vancouver and in each of the Prairie Provinces, with the inspectors to deal adequately with complaints. The personal factor in the supervision of the handling of the grain is stressed by the commission. It urges the selection of well-qualified men for the Grain Board, with the Chief Commissioner a man of outstanding ability. Increasing the remuneration of inspectors to prevent so many being drawn off by the pools and by private enterprise, thus lowering the efficiency of the staff, is recommended. And it is proposed that elevator agents throughout the West should be licensed, with power to the Grain Board to cancel licenses, in order to have better assurance of the competence and reliability of the men receiving the grain at the elevators.

The report states that while most of the agents are satisfactory, there are some who are not, and should not be engaged for the work. The report says that the farmers are not satisfied that they feel that they could get a better price for their grain but for what happens to it after it leaves their hands. The report also says that the farmers are not getting the fullest return possible for their product.

The Committee on Agriculture at Ottawa, which has been discussing the grain question for weeks, particularly grading and mixing, will receive this report of the Saskatchewan Commission, and some of its recommendations at least will doubtless be included in its report to Parliament and result in legislation that will better protect the interests of the farmers and remove some of the cause of complaint.—Manitoba Free Press.

Solved Housing Problem

Missouri College Student Finds Moveable Home Very Convenient
John Davenport, of Mevor, Mo., wanted to go to college but didn't have the money to pay room rent, so he built his own home and moved it to Trenton, so that he could attend college there. When he has completed his two-year course he will move his little house to Mevor, and finish his college education at the University.

When Davenport wants to "move" he pulls twenty-five bolts and the house is ready to be picked up on a truck. He can rebuild in six hours. He plans to settle outside the city limits, or wherever he can find the cheapest site. The house is a one-room affair, heated by a little coal stove. John cooks his meals on a three-burner oil stove.

He gets his supplies from the store-room of home-canned vegetables and fruit at home. He uses his Ford car to transport the food.

The windows are large and neatly curtained. The furniture is adequate but meagre. The little shelter is electrically lighted.

Canada, with one tenth of the world's coal deposits, is in an enviable position, according to Sir Arthur Cockburn, head of the British mission to Australia on Empire Trade.

The Girl: "What is your opinion of these girls who imitate men?"
The Man: "They're idiots."
"The imitation is perfect, eh?"

THE CHIC SPORTS TYPE

The chic sports dress of feather-weight woven in grey tones, uses black bone buttons to emphasize diagonal line of bodice belted at normal waistline. The skirt has plaited each side of centre, forming hospital to carry out vertical line. Style No. 561 can be had in sizes 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust. Checked silk in red and white plaid pattern is ultra-smart for now and later seasons. A navy blue crepe with dots of chartruese shade is sportive and wearable. Plain light red silk crepe, printed cotton toulard in foliage green tones, navy blue crepe with dots of chartruese shade is sportive and wearable. Pattern price, 50c. (4-ounce or 5-ounce fabric preferred). Wrap could substitute.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including dress ensembles, and cute designs for the kiddies.

CAPTAIN E. GILLAM

who for many years has been piloting vessels of the B.C. Coast Steamship service, in and around the west coast, has been transferred to captain of the Prince of Wales, newest ship in that particular service. He first took the bridge of the Norah when the "Red-Regal" party were guests of the Canadian Pacific Railway on a four-day cruise up the west coast of Vancouver Island.

Peace River Land For Homesteading

Former Forest Reserve Near B.C. Boundary To Be Thrown Open
About 6,000 homesteads or approximately 1,000,000 acres in the Grande Prairie District, Peace River, Alberta, and in the Peace River, British Columbia, will shortly be thrown open for entry, according to information reaching the Colonization Department of the Canadian National Railways here. This area includes land formerly held as forestry reserve lying between the sixth meridian and the British Columbia boundary line and bounded on the north by the north line of township 81 and on the south by the 56th parallel. An additional area will also be surveyed and thrown open to homesteading. It is expected that entry may be made for some of these lands by about April 15th.

Canada, with one tenth of the world's coal deposits, is in an enviable position, according to Sir Arthur Cockburn, head of the British mission to Australia on Empire Trade.

The Girl: "What is your opinion of these girls who imitate men?"
The Man: "They're idiots."
"The imitation is perfect, eh?"

KING AND QUEEN AT ROGRO

During a band concert given in front of Craigville House, near Rogro, the King took occasion to walk down to the seaway to say a few words to the crowd collected there. The loud cheers that greeted him were interspersed with shouted good wishes for his further recovery. That both the King and Queen were delighted by the welcome accorded them may be surmised from the smiles seen in this picture which is one of the first to show the King walking after his long illness.

Forty Million Hens

The Enormous Production Of Eggs In Canada

Canadian poultry flocks are estimated to include about forty million hens from which the enormous egg production of the country is obtained. By actual test many of these hens lay very few eggs or none at all, while many others make creditable records by producing upwards of three hundred eggs in a year. The use of the trap nest is throwing much light on the actual performance of hens.

For nine years the Department of Agriculture at Ottawa has been operating a poultry census of Performance for Poultry, whereby yearly egg laying records have been kept for an increasing number of birds. Since the work began 103,873 birds had been trap nested up to the end of November, last year. The work has been increasing from year to year until 288 flock owners entered birds last year. This was an increase of thirty-six breeders and 5,803 birds over the previous year.

The birds when entered are numbered with leg bands, and those that lay 100 eggs or over, qualify for Record of Performance certificates, those that lay 225 eggs or over, qualify for advanced certificates. In either case the eggs must weigh not less than two ounces each, and have been laid within a twelve month period. Through the distribution of eggs and keeping stock from the Record of Performance flocks, the egg laying qualities of the flocks of the country are being built up. The gain thus made is regarded as almost clear gain because production is increased without the necessity of increasing the number of hens kept.

The report of the Record of Performance work carried on by the live stock branch of the Department of Agriculture, at Ottawa, for last year is an interesting document and one of great value to egg farmers who may be looking for hatching eggs or breeding stock with which to improve their flocks. This report for last year, numbered 8, is available at the Publications Branch of the Department of Agriculture, at Ottawa.

A Lesson In Honesty

A little boy had been reported to have stolen apples from the stall outside a fruiterer's shop, and the parent was pointing out the evils of theft.
"My boy," he said, "you must have known that it is dishonest to steal. And in any case, didn't your conscience tell you the man was watching?"

Boy: "I suppose you're noticed we have a dozen rather pretty stenographers here?"

Applicant: "Yes—no, sir."
Boss: "Get out—I won't hire a liar."

Number Of Titled Canadians Is Found To Be Now Approaching Vanishing Point

The Drive For Titles Wends

Wends Drive For Titles Wends In Some Sections

Farm weeds have for many years menaced the growing of farm crops. Indeed the weeds are parts of Canada in both the older settled districts of Ontario and the prairie lands of the West where weeds have become so prevalent as to drive farms into abandonment. To study the question of weeds from an economic standpoint, the division of botany of the experimental farms have conducted a survey over most of Eastern Canada, including the province of Ontario, and has made a report of the work accomplished in the report of the Dominion Botanical for 1927. In all it was more than 600 species of woody and poisonous plants have been discovered and their habitat located. Fifty of the worst of these are listed in the report, which is published by the Department of Agriculture, at Ottawa, in the order of their prevalence. In concluding his report on the weed survey, the Dominion botanist points out that even in the newer sections of the country weeds have been found to be a "limiting factor in crop production, justifying great measures of control to avoid increasing trouble in future years."

Making Scientific Hay

Another Use To Which Electricity Is Put

Being Directed
Making hay without sunshine is one of the 200 uses of electricity developed by Bertram Matthews, pioneer in the application of electricity to the uses of agriculture. He has an "electro farm" of 600 acres in Sussex, England, and intends launching a scheme for rural electrification of Lincolnshire over an area of 3,200 square miles, with a capital of \$50,000 for which he has been granted a special order by the electricity commission.

Matthews is convinced that the future of Lincolnshire are being developed by the use of electricity, examples of which he quotes as electric threshing, electric ploughing, electric mowing, use of wire-meshed traps for poultry and pigs.

Muskox Sanctuary

15,000 Acres Set Aside To Preserve Almost Extinct Species

A 15,000 acre sanctuary for the almost extinct muskox is being mapped out in the Thelon Territory, east of Great Slave Lake by W. H. Goose, explorer of the North West Territories, and Warden J. A. Knox, of Fort Smith. They have already completed a reconnaissance and survey of the southern portion of the proposed preserve having begun this work last April. Muskox have been seen in this district, so Mr. Goose reports, and also large herds of caribou.

Record Price For Calf

Boy Sets Calf At Calgary Spring Livestock Show For \$2,500

A record price was established at the recent Calgary spring live stock show when the first calf in the boys' and girls' calf feeding competition sold for three dollars a pound. This calf, an Aberdeen Angus shown by Harold Richardson, of Bowden, Alberta, was an outstanding winner in its class. It was purchased by a Calgary butcher, and at a weight of 940 pounds, brought its young owner the handsome return of \$4,500.

The Robust Courtroom

For years a bitter feud had existed between the Browns and the Robinsons. The trouble started through the depredations of Brown's cat, and had grown so bad an affair that neither party ever dreamed of "making it up." One day, however, Brown sent his maid next door with a peace-making note for Mrs. Robinson, which read:

"Mr. Brown sends his compliments to Mr. Robinson, and begs to say that his old cat died this morning." Robinson's reply was bitter:

"Mr. Robinson is sorry to hear of Mr. Brown's trouble, but he had not heard that Mrs. Brown was ill."

Angry Passenger—What good are the figures down in these railway time tables?

Genial Stationmaster—Why, if it wasn't for them figures we'd have so many of us findin' out how late the trains are.

Nitroglycerine, the powerful explosive, is also one of the most potent heart stimulants known.

The number of titled Canadians is gradually diminishing in number and is now in a round off. The work which the Canadian parliament began in the spring of 1916, and eventually, save for a few titles of the few hereditary peers resident in this country, a generation in the not remote future will see Canada completely devoid of titles. When upon the sovereign had conferred titular distinctions.

Knighthood has not flowered in the Dominion for more than 10 years. And only a few weeks ago the House of Commons gave emphasis again to their resolve that within the lifetime of the present parliament at least, there will exist no prospect of Canada's return to titles.

In all Canada was represented in the peerage by eight persons; of baronets and knights there were in all 98. Since then 10 titles were conferred as a result of military or administrative, bringing the total to 113. In the present year of grace Canada's representation among the peers of the realm has been reduced to five barons; there are eight baronets and 71 knights—a total of 84 and a diminution of 29 in the past decade.

These figures are recalled by the recent debate in the House of Commons, where a resolution was passed to reopen the question of titles. C. H. Cahan, Conservative member for St. Lawrence-St. George, Montreal, presented a resolution which would have had the whole matter made the subject of enquiry by a parliamentary committee. Explaining his purpose, Mr. Cahan said it was desirable to remove the anomaly which existed from the fact that while in 1914 parliament had passed a resolution that no titles should be conferred on Canadians by His Britannic Majesty the same inhibition did not extend to foreign sovereigns. One of this had adopted the curious situation of alien monarchs exercising with respect to Canadians a prerogative denied to King George himself.

Mr. Cahan's resolution had the support of Premier W. L. Mackenzie King and Hon. R. B. Bennett, leader of the opposition. But in spite of this the rank and file of House of Commons voted overwhelmingly against it and for the time being the "status quo" was maintained.

The abolition of titles in Canada is one of the first offspring of the Dominion government following the 1914 election of 1917. It was on April 3, 1918, that W. F. Nicolson, then Secretary of State, introduced his famous resolution praying that "His Majesty may hereafter be graciously pleased to refrain from conferring titles of nobility on his subjects domiciled or living in Canada." Extreme democrats were delighted with this; they thought the resolution was sufficiently water-tight. A champion arose in the person of the late R. L. Richardson, member of parliament from Spruce-Man, better known as "Fighting Bob" of the Winnipeg Tribune. Mr. Richardson moved to eliminate the "statutory" part, placing a ban on titles of any sort.

It was at this stage that the then Prime Minister, Sir Robert Borden, intervened. To the amusement of the House of Commons, he announced that on March 25—two weeks prior to the introduction of the Nicolson resolution—the government had paused an inter-consultation which had been submitted to the British Colonial Secretary. This requested that no honor or titular distinction (having those granted in recognition of military service during the present war) should be bestowed by the sovereign "proprio motu" shall be conferred upon a subject of His Majesty resident in Canada, except with the approval and advice of the Prime Minister of Canada."

Mr. Borden made the matter one of confidence, and, before long, warm, for many reasons to defend this ancient institution. One of its severest critics, however, was Sir William Laurier himself. The aged Liberal chieftain said: "I am quite prepared, if we can do it without any disrespect to the Crown of England, to bring our titles to the marketplace and make a bonfire of them."

He-I have something dear. I would like to give to you about. He-I'm glad that of. As a rule you want to speak of something you haven't got.

Fanner A—Have you finished plowing the ten-acre field?

Fanner B—Then you can attend to the harrowing details.

CHURCH'S HOT & COLD WATER
Alabastine

Dr. Williams' Pink Pills for Pale People

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. This best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The system disappears in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

CHAPTER XXIII.—Continued

The rush of winds sounded high in the air as wild ducks passed in swift flight on their yearly pilgrimage to the south. Occasionally a flock would lower in gradually narrowing circles to land with a splash in the restful waters of the lake, then to stretch their wings, the while labelling their heads and quacking contentedly. Flocks of geese passed in wedge-shaped formation, their honking coming faintly from a dizzy height. A flock of Arctic swans, banking so low that the crisp rattle of their wings could be heard, landed in the centre of the lake with a great commotion. There with their beautiful backs proudly arched they floated the white ghosts throughout the night. The red and yellow leaves, like gaudy curtains draped the deciduous trees. The wild crab-apple and high-bush cranberry fringed from the naked branches. The sun was surrounded by a ring and shone straight through the canopy of leaves. The unmistakable breath of the north wind was in the air.

"One does not miss his traps down there," said the old man, "but a patch was needed to a worn moccasin, and new leaces were inserted in his moccasins. 'Winter's come,' of time, and we're going to have a heavy fall of snow," he mused to himself. For years Nature gave warning, then on the second night the storm came.

A roaring wind the storm from the north, lashing the waters of the lake to foam, tearing at Donald's cabin with the strength of invisible giant hands, and howling through the forest with shrieking walls. Gust came upon gust with increasing strength, and in the short lulls could be heard the swish of the sleety snow against the windows.

The big trees creaked as they swayed in the gale, and with a loud groan, as if in mortal pain, a huge forest monarch, as its roots gave way, fell crashing down the smaller trees to smite the earth with a resounding crash.

The wind went down through the night, but the snow fell steadily. When Donald opened his door next morning he looked out on a new world. The wizardry of frost and snow had given the earth a blanket of white that was eye-blinding in its brilliancy under the bright morning sun. The keen frost had locked the lake light under a coating of clear ice.

CHAPTER XIX.

With a fond hope that he would receive word of the Walwrights, Donald eagerly awaited the coming of each mail, but after a month of dis-

His mind went back to his first meeting with Connie, then on through the many thrilling episodes of the summer. She belonged to high mountains, to deep forest glades, to companionship with the birds, flowers and trees of God's wild outdoors. She would never be content with the bad air and the cramped conventions of cities. He suddenly remembered the work she had used that day by the stream near her nest in the cedars. He seemed to hear her soft, hesitating voice with its pleasant English accent.

"And," she had said, "six months out of every year I'd come right here and live in these mountains."

"She'll come back," he said aloud. The thought cheered him. "She'll come back," he repeated to himself. "I hope so, Donald."

A week later, Robert Rennie, accompanied by his daughter, arrived at Summit Lake. The owner's house was in high spirits. "I am pleased with the excellent work you are doing here," he said, as he placed a hand on the shoulder of Donald. "The mill is a success—a huge success—and I know who deserves the greater share of the credit!" He smiled up at Donald. "Next week," he went on, "an event of importance to the lumber industry takes place. The Government is to entertain an admiral. Was proud when the chief forester called at my office to party of Eastern lumbermen. I will tell you that this mill had been selected as the most modern and efficient in the Province, and requested permission to bring the Government's admiral."

"They are to stay here a few days, but will not be inconvenienced, as the train will be supplied with dining and sleeping cars," he said. "The occasion by the C.P.R. I will come with them, but I am leaving it to you to arrange for the admiral's visit and to see that everything is in tip-top shape for their arrival."

As Robert Rennie was leaving the next morning, he was told by Donald, "By the way," he said casually, "I have decided to add a yearly bonus to your salary, based on the profits of this mill. I have made it retroactive from the time you took charge." Before Donald had time to express his thanks, his employer swung aboard the train.

Expressing a desire to be at the lake on the arrival of the excursion, Donald remained.

On the day set for the visit of the Eastern capitalists the sun rose radiant promise of a typical June day. The leaves were now fully matured, and the willows and maples rustled under the soft warm winds. All the valley was clothed in a verdant, quivering, gently pulsating life.

The long train drew slowly into the depot. Its occupants poured out onto the small platform was filled to overflowing. Robert Rennie, accompanied by a slender man dressed in a tweed suit and cap, pushed his way through the crowd to Donald's side.

Donald greeted his employer, then glanced casually at Mr. Rennie's companion. His eyes widened. "Mr. Walwright!" he gasped.

Walwright laughed happily as he waved Donald's hand.

"Is—Is—Miss Walwright with you?" queried Donald.

Then he said:

(To Be Continued.)

Solidity Reduces Sentence

Many Criminals in France Prefer Isolation For This Reason

In France's modern prison at Fresnes-Rungia, 1250 white-masked prisoners live in absolute isolation. They neither see each other's faces or hear their voices. From the moment a metal number is hung around his neck, the prisoner is required to wear a white hood whenever he leaves his cell and he may not speak to his fellows. He sees the face of his guard from time to time, but not of other, unless he is sent to the hospital or to the warden for discipline. Alone in his cell, he works eight hours a day, but good will and skill enable him to reduce the time to six hours and the money he earns enables him to buy small comforts. The government receives thirty-two cents a day from contractors for each prisoner's work and gives from three-tenths to half the money to the prisoner. The prisoner never sees the money till he leaves, but half of it is placed to his immediate credit for his little expenses. Yet in spite of all that many criminals seek to be sent here because the solitude entitles them to a reduction of one-fourth of their sentence.

Scientist Makes New Discovery

Says Milk Treated By Wireless Waves Keeps Sweet For Weeks

An Austrian scientist claims to have discovered a method by which milk treated by wireless waves of short length can be kept sweet for three or four weeks. The new "wireless milk" is produced by passing an intense beam of short waves through the liquid. This is said to kill all germs which cause milk to turn. The milk itself is not heated by this treatment, and does not acquire a "cooked" taste.

Little Helps For This Week

"Consider the lilies of the field,"—Matthew vi. 28.

Consider then the lilies.

O heart of mine, say; They neither toil nor spin to win Their beautiful array. I would that thou couldst lead a life So fearless, sweet as this.

—Margaret E. Sangster.

There is a wise meaning and a precious design in every part of the lily's adornment and every curve of its grace. Its symmetry is a typical proof of the divine justice. Its life is co-ordinated, and keeps time with the sublime motions of the heavens; and its structure and uses are full of the profound teachings of the unsearchable God. And if God thus care for an individual flower which today is, and tomorrow is cast into the oven, how much more will He care for an individual human being whom He has made in His own image, and upon whose life He has made such momentous issues to depend.—Hugh MacMillan.

Auction Sale Of School Lands

Nearly \$400,000 was realized by the auctioning of school lands, all within a radius of forty miles of Regina, the other day. The number of quarter sections sold were 58 out of 381 listed for sale, and the average price realized was \$12.80 an acre, the total amounting to \$398,454.00.

There are more than 1,024,000 persons in the name of Johnson in the United States.

The average hour will blow 150,000 times before wearing out.

Potash In British Columbia

Large Scale Fertilizer Industry To Supply the Needs Of Prairie Farmers

"Substantial fortunes are awaiting the prospectors who unearth some of the potash believed to be stored away in the mountains of British Columbia," said George H. Kilburn, of the Consolidated Mining and Smelting Corporation, which is working out a large-scale fertilizer industry at Trail to supply the needs of the Prairie Provinces. Mr. Kilburn mentioned that the company is making free analysis of potash specimens submitted so as to assist prospectors.

GOOD IN EVERY WAY

Baby's Own Tablets Banish Babyhood and Childhood Ailments

A medicine that all mothers praise as good in every way—a medicine that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times and in all places. They act through laxative which by regulating the bowels and stomach banish colds and simple fevers; correct constipation and indigestion; relieve colic and flatulency and make the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, Westmeath, Ont., who writes: "I have four children and whenever any of them are ill I always get Baby's Own Tablets and have found them good in every way. I would not be without them. Tablets and would also like to give your little booklet 'Care of the Baby in Health and Sickness'."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Saskatchewan Famous For Clays

Saskatchewan has a greater variety of clays, in larger quantities and of the higher grades, than any other Canadian province, and will, without doubt, become the centre of a very important ceramic industry. The clays of Saskatchewan have been the subject of special investigations by the Department of Mines, Ottawa.

There are more than 1,024,000 persons in the name of Johnson in the United States.

The average hour will blow 150,000 times before wearing out.

Saving Seven Seconds

Many Motorists In Attempting It Have Lost Their Lives

It has been established that seven seconds is the average length of time it takes a fast railroad train to get by a level crossing. That isn't a long period of time to the living, but it has meant eternity to many thousands of motorists who couldn't spare the seven seconds. They risked their lives to save them. Most everybody, in motoring across the country, has on two or three occasions hurried to cross a railroad track ahead of a train, so that they wouldn't have to wait. Some others valued the seven seconds so highly they paid with their lives for them.

THE MAN: "Whether marriage is a failure or not, I certainly think that some are more fortunate than others in what they get."

His Wife: "Yes, I quite agree. For instance, you got me, but I only got you!"

Aching Feet

Swollen and sore from a day's strenuous work can be relieved by Masard's. Baths in warm water solution.

MASARD'S BATHING SOLUTION

"KING OF PAIN" LINIMENT

FLU Germs Breed In the Throat.

First: Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight deadly "flu" which is creeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nevirine. Half a teaspoonful of Nevirine in water makes a most efficient gargle. The germ-killing properties of Nevirine quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nevirine. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of mass-breeding germs. This combination treatment of Nevirine and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Do you know that upwards of 100,000 gallons of medicinal cod liver oil are yielded every year as a by-product of Canada's expanding sea fishery. The oil owes its specific medical value to richness in vitamin content and, in a lesser degree, to its iodine value.

The Octopus, which frequently figures as the villain in many a sea story, gets a special mention in the prosaic statistics of the Canadian fishery. During the year 1928, the catch on the Pacific Coast totalled 357 hundredweight.

About Town and Country

Monday, May 6, was Arbor Day, and considerable activity in cleanup work and gardening was noticeable.

Light frosts prevailed over the week-end, and while the weather during the daytime was fine and clear, the atmosphere was quite chilly.

Mr. William Englund of Calgary was a town visitor over the week-end.

The Oyen High School girl's basketball team were Alaska visitors last Saturday afternoon, when they played the girl's team of the border town and won the game by a score of 17 to 7.

R. W. Bro. William S. Cameron, of Drumheller, D.D.G.M., paid an official visit to Oyen Lodge No. 104, A.F. and A.M., last Friday evening.

Mr. H. J. Cooper, who was a business visitor in Calgary last week, returned to Oyen Friday morning.

A new oil shed was erected last week for the British American Oil Co., and supply tanks are under course of erection. This company will be represented in Oyen by Mr. Gordon Caswell.

A new concrete sidewalk was laid in the hamlet of Sibbald, on the west side of Main Street, last week. Mr. George Langmuir of Oyen was the contractor. It is the intention of the municipal council to gravel the main street of Sibbald.

Subscribe to your home paper!

Mr. Hubert Peck received a severe shaking-up last Tuesday when he was attacked on his farm near Cochrane, by a bull. While somewhat bruised about the chest, his injuries fortunately were not serious. The animal was afterwards destroyed.

Mr. John P. Rorabeck purchased a new Ford Coupe last week.

Next Sunday is Mother's Day. A special service will be held in the United Church Sunday School at 2 p.m., to which everybody is cordially invited, especially the mothers.

Mr. W. V. Miller was a Calgary visitor last week.

Born—On April 6th, to Mr. and Mrs. Agar at Coronation, a son. Mrs. Agar was formerly Miss Grace Bray of Sibbald.

Sale of Home Cooking and Afternoon Tea at the Vicarage on Saturday, May 11. Opens at 3 p.m.—Women's Guild of All Saints Church.

There will be special music at the evening service at the United Church, Oyen, next Sunday.

Fire Destroys Barn, Shed and Small Work Shop

Fire broke out shortly before 11 o'clock last Thursday night in the barn owned by Mr. William Allcock, situated at the rear of his residential lot, and entirely demolishing the building as well as a large shed at the rear of Mr. Humphrey Desmond's residence, and a small workshop owned by Mr. A. G. McDonald.

The fire was first noticed by Mr. Allcock, who after retiring, got up to get a drink of water. Seeing what he thought to be a light in the barn he went out to investigate and finding a blaze in the centre of one of the stalls, he started lustily to yell "Fire".

Advice was phoned in to "Central" to turn in an alarm, and the fire bell was clangling its warning to the town. The chemical engine was rushed to the fire by Arthur Johnson who towed it there with a Ford car, and after a slight delay a stream was being directed on the blaze with good effect by "Pat" Blue. For a while it looked as if the fire would be confined to the barn, but the flames, fanned by a stiff east wind, were whipped to the adjoining shed which was also demolished, as was a small building used by A. G. McDonald as a work shop. Flying embers were carried a considerable distance by the wind, but no further damage was done.

Mr. Allcock estimates his loss at \$500 with no insurance. The shed at the rear of Mr. Desmond's residence, was probably covered by insurance by the Beaver Lumber Co. who owned it. Mr. McDonald had no insurance on his work shop.

CARD OF THANKS

Mr. William Green and family desire to express heartfelt thanks to neighbors and friends for the kindness and sympathy extended to them in their recent sad bereavement.

Blacksmithing and

Acetylene Welding

Just arrived, car of blacksmith coal fresh from the mine. Cannot be equaled in district. \$2.00 per hundred pounds. Procure your supply from Kerr Hardware or the Blacksmith shop. A complete line of bar steel always on hand. We are agents for the Famous Crescent Shares. (None better—Ask the man who uses them).

Blacksmithing and Acetylene Welding done on a cash basis only.

Low Cost VACATIONS

Possible for thousands of
Residents in Western Canada

Arranging low fares for prairie residents, we regard this part of our work as a great and important public service... always ready with men, experience and the experience which enables us to care for any movement with smoothness and efficiency.

This summer—escape for a little while from the dull sameness of succeeding days. Our low fares from May 15 to Sept. 30 (with a final return limit Oct. 31, 1929) make it easy.

Our trains pass through a territory replete with scenic grandeur of historical and educational value to the traveller. Nothing superior to our sleeping and dining car service... Radio, an added feature on through trains.

THINK IT OVER!

Whatever vacation action you have in mind, our local agent will be pleased to give every assistance. He will be glad to quote lowest fares and make arrangements for you or write

J. MADILL, District Passenger Agent, Edmonton

Keep The Flies Out

Flytime is close at hand. We have a full line all sizes of 1½ inch Cedar Screen Doors, mortised and tenoned at all joints. They are light and strong—the kind that does not warp.

"Puritan" Gasoline Stoves

With warmer weather coming, and spring cleaning almost over, you are probably thinking of a gasoline stove. We invite you to come and examine our "Puritan" three-burner gasoline stove. It is both safe and efficient.

For camping or picnic use KampKook.

These Good
USED CARS
must go
Look
em
over

JUST when we think our stock of Used Cars is away down . . . in come, a lot more, taken in on the Spring deliveries of Outstanding Chevrolets. And they are certainly the finest, smartest bunch of used cars we've seen in many a long day. But . . . good as they are . . . they have to go. And when you look over the cars and see the prices you'll realize they will go fast. Come in tonight. Or as soon as you can. This chance to save dollars on a REALLY GOOD car is too unusual to miss.
